

From the creators of Web Jockey comes...

JOCKEY^{PRO} LT

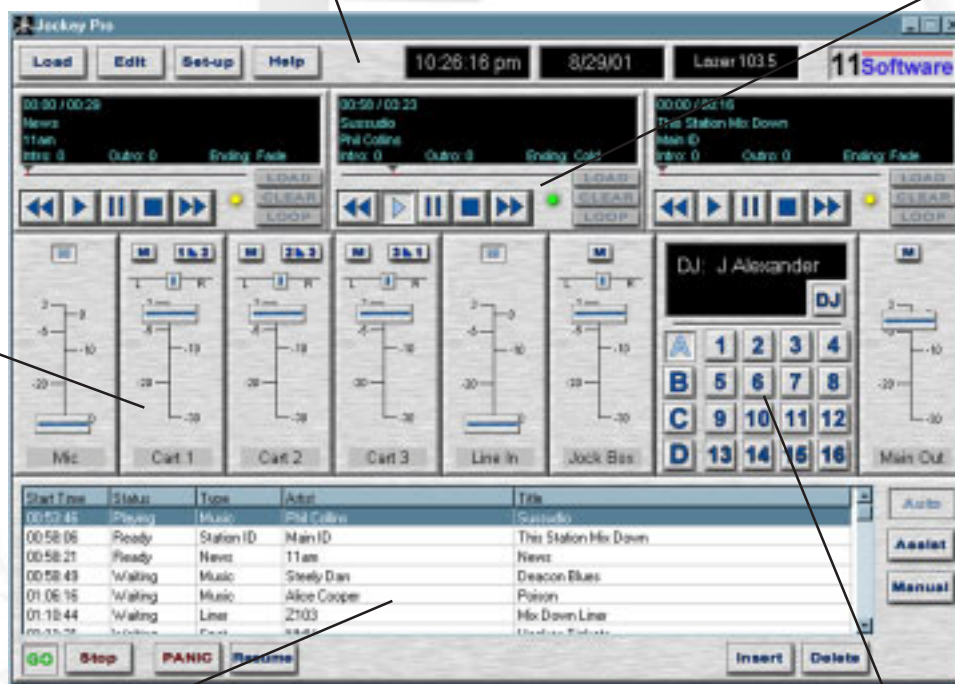

- Separate On-Air and Program Log Scheduling systems
- 12 or 24 hour time clock with Internet TimeSync™
- Selectable On-Air DJ JockBox - Now with sixty four user definable buttons
- Improved Scheduler handling
- User definable categories
- Selectable spot break points
- Vastly improved Schedule Generator - Generate program logs in seconds with SmartStart™

Same great easy to use On-Air interface...

On-Air Interface comes with multiple Skins and can be sized from 800 x 600 to 1024 x 768. Extremely easy to use with user friendly design.

On board virtual mixer which works well in both a studio environment or for those times your "on the road" and don't want to carry a mixer with you. Extremely useful and cost effective for Internet only stations.

Three separate "cart decks" show you what's going on in a glance. Each cart deck has a count up / count down timer, artist and song information, intro and outro with ending type, Rewind, play, pause, stop and fast forward controls. Decks also include load, clear and loop when under manual operation.

The Program Log shows you what's coming up as well as what has played and when. You can select between Auto - for full automation, Assist - for when you want to run with a Live DJ or Manual - for when you feel like building your own schedule on the fly. Our handy Insert / Delete buttons allow you to quickly insert songs, ID's, spots, etc. directly from the database.

A JockBox (audio wall) comes standard with our On-Air system with 64 user definable buttons for quick access to sound effects, comedy bits, sounders, etc. You can also have multiple DJ's, just press the DJ button and access your personal JockBox settings.

Completely new and improved Database editing system...

From within the scheduler you can:

- Add and delete audio
- Create your own categories
- Edit intro and outro times
- Edit mark in and mark out timing
- Assign an audio files gender

Will you be next?

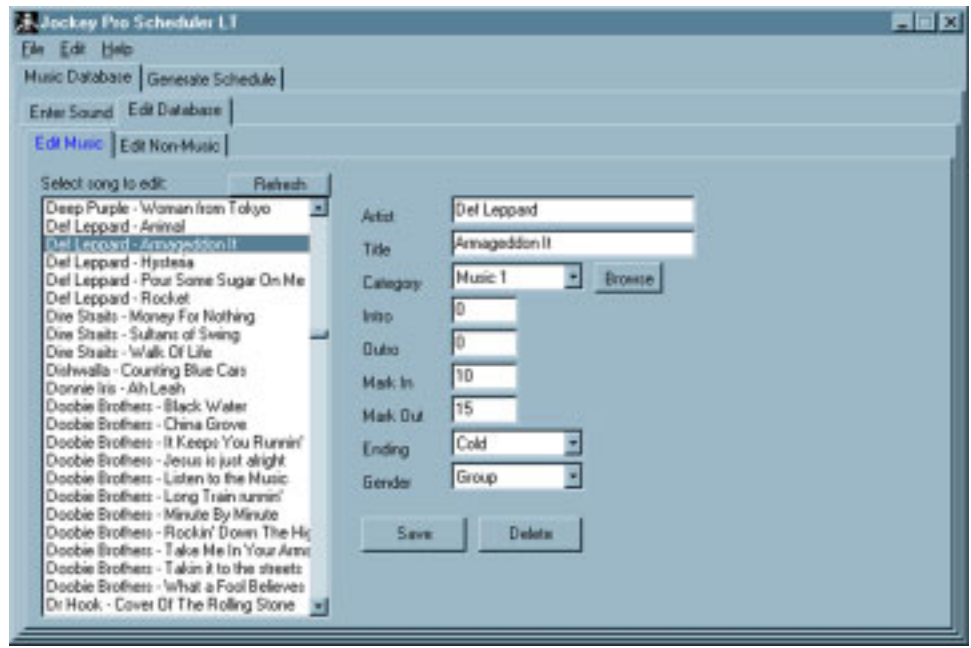

I have spent months looking for a software package for a small radio station. Full automation with live assist and a simple scheduler that was easy to use was all I needed. My quest has now ended, thank you.

- Michael Mc Clure

Well guys... I have tried and looked at lots of similar programs out there, but yours seems to be the first to be just what I need to fully automate and kick off my new station. Thank you.

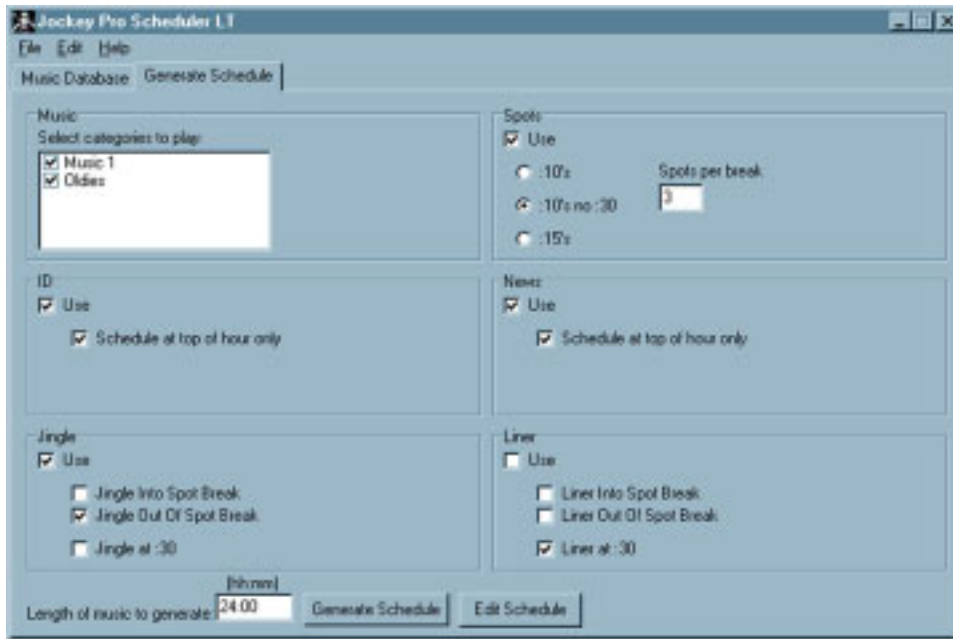

- Blake Edwards

Thanks for writing such a great program. Finally someone "gets" what we really need out here. By the way, I love the JackBox!
- Jarrad Brooke

...Generate program logs faster than ever with our new

SmartStart™ Scheduling system!

Real scheduling power that is easy to understand and use. No confusing DOS screens, no four or five different windows open at the same time, just one easy to use, intelligently designed interface.

Simply select the options you need, enter the desired amount of hours of programming time needed and let JockeyPro LT do all the work!

Our new SmartStart™ scheduler even accounts for mark in and mark out timing, so hourly times are extremely accurate.

You won't find this kind of programming power in any other software package on the market in this price range!

Redefining Radio Automation by making it work
